

Support Passage of Bill #5283, Agriscience funding.

Agricultural education has always been important to Connecticut and the need for it is growing: sustainable food, numerous environmental concerns, and hands on experience with business plans and equipment maintenance. Three generations of my family have benefited from the Vocational Agriculture programs in 2 different school districts. Most importantly, the leadership skills learned in Agriscience have crossed over to their current occupations.

Please pass Bill #5283 to improve the method of funding support of our Agriscience Programs.
